Profile with Assets Image

Already done – like this one on stage 07

SVG

Already done in tasks

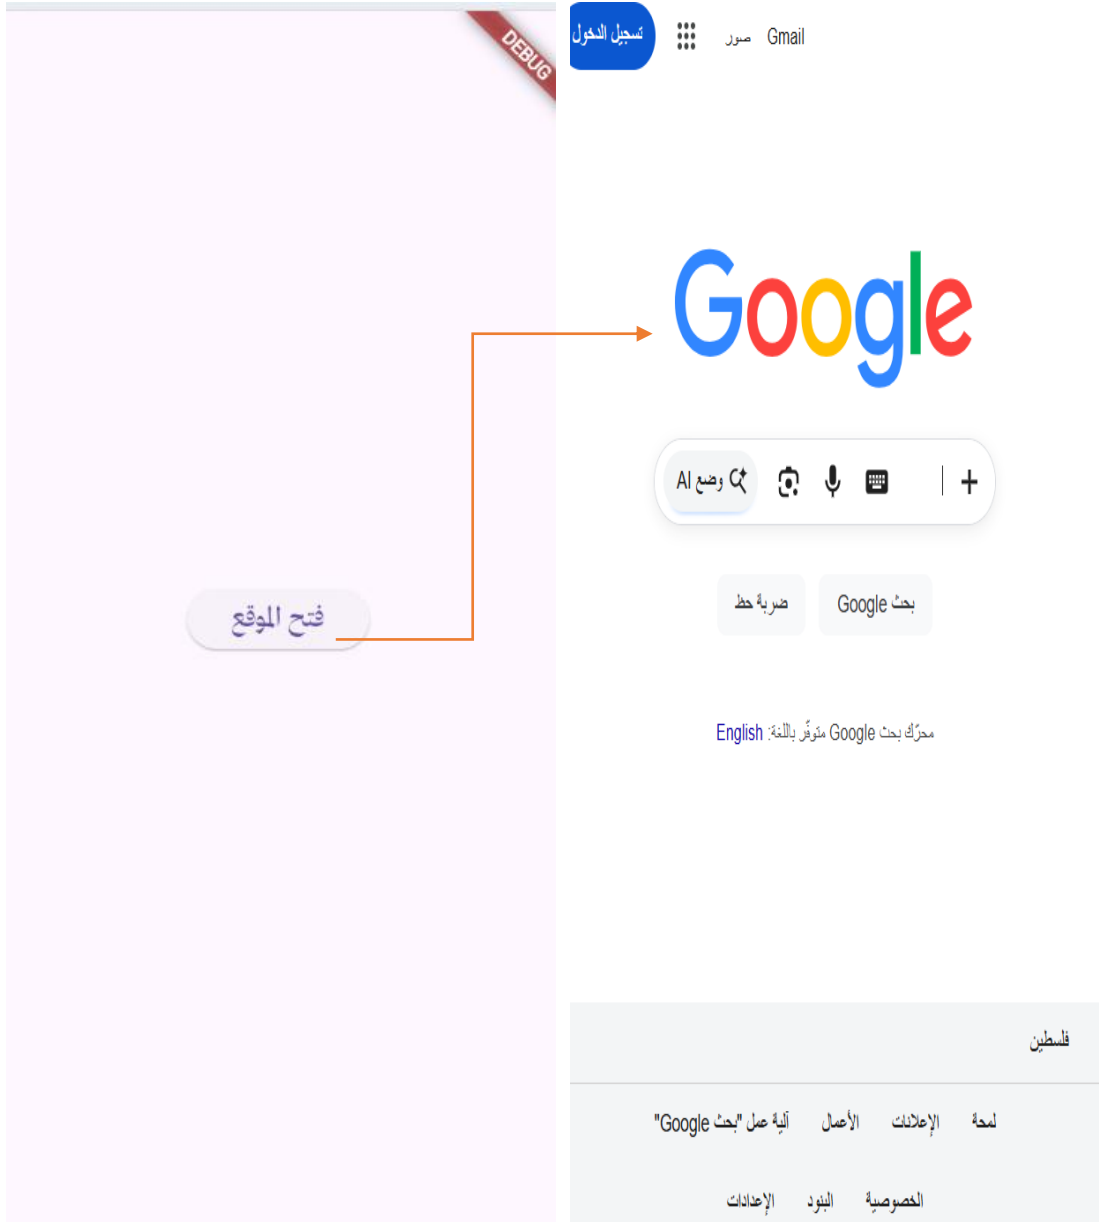

Ex:

```
leading: SvgPicture.asset(  
  "assets/images/search_icon.svg",  
), // SvgPicture.asset  
) // SearchBar
```

Open external link

```
import 'package:flutter/material.dart';  
import 'package:url_launcher/url_launcher.dart';  
  
class ExercisesStage11 extends StatelessWidget {  
  const ExercisesStage11({super.key});  
  
  Future<void> openWebsite() async {  
    final Uri url = Uri.parse('https://www.google.com');  
  
    await launchUrl(url);  
  }  
  
  @override  
  Widget build(BuildContext context) {  
    return Scaffold(  
      body: Center(  
        child: ElevatedButton(  
          onPressed: openWebsite,  
          child: const Text('فتح الموقع'),  
        ),  
      ),  
    );  
  }  
}
```

Save username

Login Screen

```
import 'package:flutter/material.dart';
import 'package:shared_preferences/shared_preferences.dart';
import 'package:stage10/screens/stage11/Home.dart';

class Login extends StatelessWidget {
  TextEditingController controller = TextEditingController();

  Login({super.key});

  @override
  Widget build(BuildContext context) {
    return Scaffold(
      body: Center(
        child: SizedBox(
          height: 100,
          child: Column(
            children: [
              TextFormField(
                controller: controller,
                decoration: InputDecoration(hintText: "Enter youe username"),
              ),

              MaterialButton(
                onPressed: () async {
                  SharedPreferences pref =
                    await SharedPreferences.getInstance();
                  await pref.setString("username", controller.text);

                  await pref.setBool("loggedin", true);
                  Navigator.of(context).push(
                    MaterialPageRoute(
                      builder: (context) {
                        return Home(username: pref.getString("username")!);
                      },
                    ),
                  );
                },
                child: Text("Login"),
              ),
            ],
          ),
        ),
      ),
    );
  }
}
```

Main

```
import 'package:flutter/material.dart';
import 'package:shared_preferences/shared_preferences.dart';
import 'package:stage10/managers/manager_font_family.dart';
import 'package:stage10/screens/stage11/Home.dart';
import 'package:stage10/screens/stage11/Login.dart';

void main() async {
  WidgetsFlutterBinding.ensureInitialized();

  SharedPreferences pref = await SharedPreferences.getInstance();

  bool loggedin = pref.getBool("loggedin") ?? false;
  String? username = pref.getString("username");

  runApp(MyApp(loggedin: loggedin, username: username));
}

class MyApp extends StatelessWidget {
  final bool loggedin;
  final String? username;

  const MyApp({super.key, required this.loggedin, required
this.username});

  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      theme: ThemeData(fontFamily: ManagerFontFamily.mainFont),
      home: loggedin ? Home(username: username!) : Login(),
    );
  }
}
```

Login screen

Home screen

After hot restart

Change and save a theme
