Practical Exercise 01

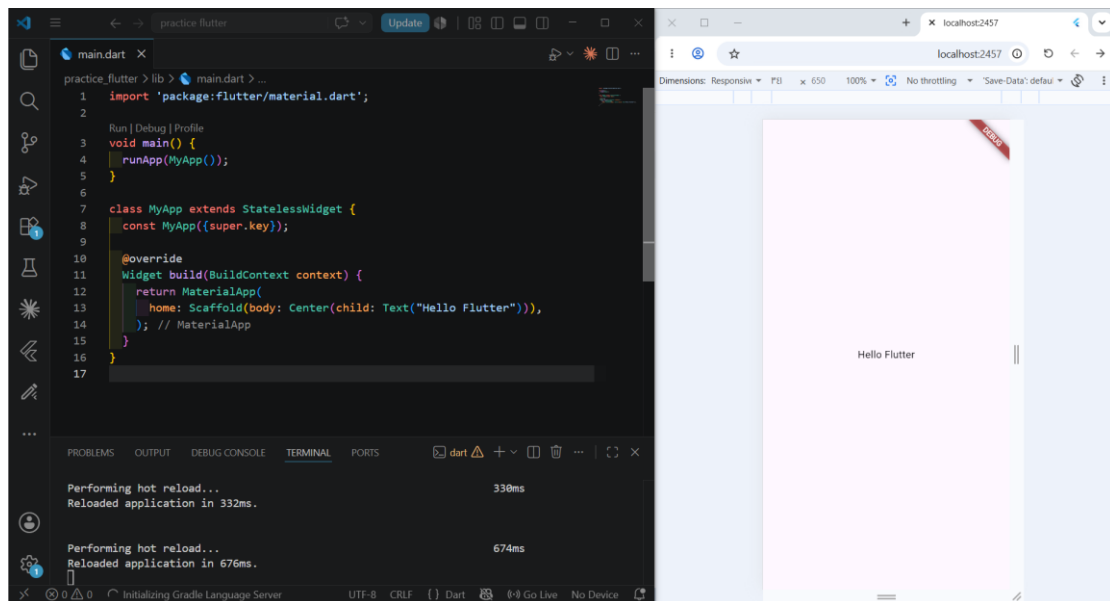

Running Hello Flutter

```
import 'package:flutter/material.dart';

void main() {
  runApp(MyApp());
}

class MyApp extends StatelessWidget {
  const MyApp({super.key});

  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      home: Scaffold(body: Center(child: Text("Hello Flutter"))),
    );
  }
}
```

Practical Exercise 02

Editing the Text & Color

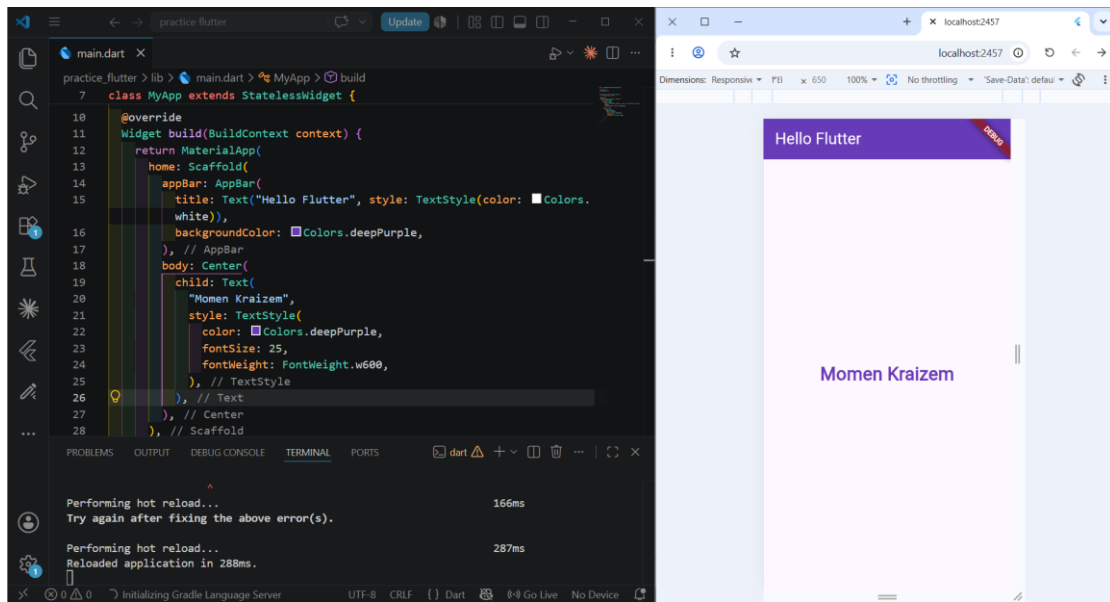

I made some more changes – here is the code:

```
import 'package:flutter/material.dart';

void main() {
  runApp(MyApp());
}

class MyApp extends StatelessWidget {
  const MyApp({super.key});

  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      home: Scaffold(
        appBar: AppBar(
          title: Text("Hello Flutter", style: TextStyle(color:
Colors.white)),
        backgroundColor: Colors.deepPurple,
      ),
      body: Center(
        child: Text(
          "Momen Kraizem",
          style: TextStyle(
            color: Colors.deepPurple,
            fontSize: 25,
            fontWeight: FontWeight.w600,
          ),
        ),
      ),
    ),
  );
}
```

Practical Exercise 03

Trying Hot Reload

Hot Reload was already tested in the previous exercise.
